

INJECTOR DISMANTLING AID

PRODUCT OVERVIEW

Injector Dismantling Aid for releasing jammed components in the engine and cylinder head area such as injectors, spark and glow plugs. Extreme cooling (-40 °C) breaks down corrosion and residues. The high-grade synthetic oil containing PTFE particles quickly and effectively penetrates the resulting micro cracks and allows for easy and gentle removal.

- High-grade synthetic oil
- Cooling to -40 °C
- Lubricious PTFE particles
- Fat and acid free
- Infiltrates rust and displaces moisture
- Extreme capillary action
- 360° upside-down valve

APPLICATION

Engine and cylinder head areas.

DIRECTIONS

Shake product vigorously before use. Remove large contaminations manually. Apply product generously to the base of part to be removed (injector/cylinder head) and let work for 10-15 minutes. Repeat as needed. Remove loosened contaminants with compressed air.
