

## Air-Con Foam Cleaner

### PRODUCT OVERVIEW

Air Con Foam Cleaner is a professional surface active cleaning foam for effective cleaning of the interior of the air conditioning system. Forms a protective film on the evaporator for fresh, clean air and optimal cooling-performance. Removes residues and mould and kills fungus and bacteria. Neutralises unpleasant odours. Nontoxic and odourless.

### APPLICATION

Air Conditioner Foam Cleaner has been especially developed for the quick and easy cleaning of air conditioning units in cars, trucks and buses etc.

### DIRECTIONS

1. Drying of condenser: Start the engine, switch off the Air Conditioning A/C. Set the air flow to recirculation on full fan power and maximum temperature (for 5-10 minutes). This procedure is very important as moisture within the A/C System can impair the cleaning effect.
2. Cleaning: Before applying the foam cleaner switch off the engine. Shake can well before use. Insert the adapter into the drainage hose. Spray the complete content into the condenser unit. After approx. 15 minutes reaction time the foam becomes liquid and runs out from the condenser unit (drainage hose). Finally make sure that the drainage house is free from any residues. The cleaning process is now finished.

### REACTION TIME

Approx. 3 - 5 minutes

### IDENTIFICATION

ID	Size	Case Qty
PWT6122	250ml	12
