

CERAMIC GREASE

PRODUCT OVERVIEW

Ceramic Grease is a high-temperature paste with a ceramic base, brushable as lubricant, release agent and corrosion protection. For all moving, adjusting and connecting parts of vehicles brake systems (suitable for ABS brake systems, ASR, ESP systems). Prevents damage and wear of bearings, sliding brackets screw couplings and plug connections. Also suitable for other lubrication proposes in high pressure and high temperature areas.

- Metal free
- Prevents freezing, cold welding, seize up & stick-slip
- Protect against wear and corrosion
- Resistant against acids and hot and cold water
- Temperature range: -40 °C to 1500 °C.

DIRECTIONS

Clean the treated parts and afterwards apply the assembling-paste with a brush. Advice: Avoid contact with any braking friction surfaces of brake discs and/or pads.
